

Only Remedy Used in Hospitals

To Cure Nervous Prostration is

PAINE'S CELERY COMPOUND

Nervous prostration kills more people in America every week than all the infectious diseases kill in a year.—Statistician of London Medical Journal.

Nervous prostration, taken in time, is absolutely, permanently cured by Paine's celery compound. There are thousands of physicians' statements to this effect. It is the only prepared remedy used in such cases in the hospitals.

Havana, Cuba, Nov. 17.—Mrs. Lola Montalvo, who was Miss Barton's assistant, and is now nurse of the Succoring Hospital in Guanabacoa, and wife of Mr. R. J. Montalvo, Warden of the City Prison in Havana, has made this statement:

"Paine's celery compound has been used at the Guanabacoa Hospital as many as five years with great success. Many women were miserably able to move, there were others with a very weak nervous system. A hundred instances could be given of our patients who have been completely cured by using this wonderful Paine's celery compound. One bottle cured a Miss Agustina Aguiro, who had heart disease. She was old and her age was against her. Other medicines had failed. May the Lord bless those individuals who brought it before the market and public."

Gold Camp district, two miles east of the Stockton ranch, owned by Messrs. Cox, Swagney and Ryder, is being developed. Altogether about 800 feet of work has been done from the shaft, which is fifty feet, a tunnel 300 feet has been run and cross-cuts have been made from the tunnel. It is a gold proportion entirely, and the assays run from \$2 to \$15 per ton. A 20-stamp mill will be placed there as soon as possible.

A scene of animation exists at the Copper Belle. The smelter is in full blast and the matte is being broken up, packed into sacks and loaded in wagons for Cochise station. Ore is also being shipped direct from the shaft. Another shaft has been sunk and timbered and a new hoist is expected every day. Everything at this mine is working like clock-work, and the ore becomes richer as the work progresses.

There are about 200 men employed in and around Gleeson in mining, of which number the Gleeson mines employ seventy-two and Ryan Bros. and McIndrick thirty-one.

The Golden Queen Mining company, near Tombstone, of which J. J. McClelland is the manager, is making preparations for the resumption of work.

The Black Diamond company is busy arranging for the erection of its large 200-ton smelter. Development continues satisfactory at the mines, and some seventy-five men are on the payroll.

Some extensive work is contemplated at the Copper Bullion company mines at South Pass. Some good results are expected with further work.

The Copper Crown company have struck some rich copper ore in one of the mines of their group and development work is showing satisfactorily. The Crown is favorably called in a good district.

At the Great Western the work continues with a good force. This property has made a good record as a shipper and rich ore is still being shipped regularly. A leaching plant and smelter on the ground is contemplated.

Wanted for Cash, a few shares of Verde King Copper company stock. Address, Arving price, etc., Box B, Phoenix, Ariz.

ABOUT COPPER BASIN

Mammoth Mineral Deposit Discovered By Prescott Men.

Copper Basin has for years been a puzzle to mining men. Every one who has made a study of it has come away impressed with the fact that a big mine would some day be discovered there. The basin, proper, says the Journal-Miner, or the lowest part of the immense area of country surrounded by high mountains is stained with copper, while deposits of conglomerate rich in copper have also been found and worked.

Several years ago the Commercial Mining company spent probably a quarter of a million dollars in developing some of these deposits and in building an immense smelting plant, which

KIDNEY TROUBLES.

Mrs. Louise M. Gibson Says That This Fatal Disease is Easily Cured by Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKHAM:—I felt very discouraged two years ago, I had suffered so long with kidney troubles and other complications, and had taken so much medicine without relief that I began to think there was no hope for me. Life looked so good to me, but what is life without health? I wanted to be well.

MRS. LOUISE M. GIBSON.

"Lydia E. Pinkham's Vegetable Compound cured me and made me well, and that is why I gladly write you this, and gladly thank you; my bottles were all I took, together with your pills. My headache and backache and kidney trouble went, never to return; the burning sensation I had left altogether; my general health was so improved I felt as young and light and happy as at twenty."

Mrs. Louise Gibson, 4813 Langley Ave., Chicago, Ill.—\$5000 forfeit if above testimonial is not genuine.

If you feel that there is anything at all unusual or puzzling about your case, or if you wish confidential advice of the most experienced, write to Mrs. Pinkham, Lynn, Mass., and you will be advised free of charge. Lydia E. Pinkham's Vegetable Compound has cured and is curing thousands of cases of female trouble.

was afterwards burned down, when they abandoned the field. They encountered rich ore or deposits of rich copper-bearing rock, but experienced difficulty in treatment which partially influenced them in not resuming operations after the fire. The ore taken out by them was found lying in a sort of blanket form and not in well defined ledges, and all indications are that it was the result of a flow from some other point rather than the formation of ledge matter in place. The puzzle to mining men has been to learn where this flow of copper which so thoroughly impregnated the conglomerate came from. The only reasonable answer to the problem was that an immense dyke or ledge must exist somewhere in the vicinity from which it came.

After several weeks of the most systematic prospecting of the mountain sides and gulches, higher up in the basin, by W. W. Munds, Thomas W. Kyle and George A. Beach, they dis-

covered what they consider the solution of the problem, in an immense sulphide dyke, running in a northerly and southerly direction. This dyke varies in width from 100 to 300 feet. One wall is granite and the other porphyry and the capping is of iron, burned in many places, by a combination of chemicals or from some other agency. The dyke contains no prominent outcroppings and at such places as these do occur there is nothing to indicate the existence of mineral bearing rock to an inexperienced eye, and even an ordinary experienced prospector would pass it by unnoticed. Mr. Munds has had twenty-five years practical experience in mining and prospecting and has also made a study of the subject theoretically through extensive reading on geological formations, so far as it pertains to mining, and as stated, after weeks of thorough investigation was able to locate the boundaries of this dyke, a very difficult task, as will be seen by any one looking over the ground, on account of its being covered in most places, both by a thick layer of earth as well as by a dense growth of brush. A gulch in one place cuts across it and exposes both walls very plainly, as well as exposing the contents lying between its walls.

At every point in this gulch between the well defined walls of the dyke, copper and iron sulphides exist which give a fair value in copper and gold, and at different points along the banks of the gulch small openings have been made, from which remarkably rich ore has been taken.

In prospecting the country on either side of this dyke Messrs. Munds, Kyle and Beach discovered a number of ledges, all of which pointed not only into the dyke, but to a certain central point in it, the ledges so far discovered forming sort of spokes to an immense mineral bearing wheel. The celebrated old U. S. ledge, which has become historical and which has been yielding such rich ore recently, has been traced clear to this dyke, and Messrs. Munds, Kyle and Beach have located three claims on it between the U. S. claim and the apparent center of gravity of the dyke. Other ledges running into the dyke have also been located by them, as well as a number of claims on the dyke itself, the number of their locations being sixteen claims in all.

A company has been incorporated to work the claims, capitalized for \$1,000,000, of which \$300,000 has been placed in the treasury for development purposes. The officers of the company are composed of the following well known citizens: W. W. Munds, president; Thomas W. Kyle, vice president; C. E. Snider, secretary; George A. Beach, treasurer. The directors are the above officers of the company and J. L. Munds, who is now serving his second term as sheriff of this county and who is noted for conservatism in business.

A prominent burn in the dyke has been selected as the point for commencing development work. A tunnel has been run under the mountain to a distance of fifty-five feet and at the end of this tunnel a mine fifteen feet has been sunk. Good sulphide ore has been encountered in this opening, running well in both copper and gold, the lowest assay being \$7 per ton and from that up to \$11. A sample was broken off the surface of the dyke at another point and brought to town and assayed

and a value of twenty-nine and three-tenths per cent in copper and \$4 in gold and silver was obtained. The burn or gossan assays as high as \$5.50 per ton. The company has just started development but these values obtained from the very surface are certainly most promising and encouraging and gives indication that the key to the treasure vault of Copper Basin has been found and is in possession of the Copper Basin Gold and Copper Mining company.

Had Bishop Potter of New York not become eminent as a churchman, he might have won high honors as a diplomat. Asked by a lady the other day what he thought of female suffrage, he

answered: "I have got far beyond that point; I am trying to make the best terms with the sex that I can obtain."

A. J. Snell wanted to attend a party, but was afraid to do so on account of pains in his stomach, which he feared would grow worse. He says: "I was telling my troubles to a lady friend, who said: 'Chamberlain's Colic, Cholera and Diarrhoea Remedy will put you in condition for the party.' I bought a bottle and take pleasure in stating that two doses cured me and enabled me to have a good time at the party." Mr. Snell is a resident of Summer Hill, N. Y. This remedy is for sale by Elvey & Hulett.

MANHOOD RESTORED "CUPIDENE"
The Vindicator, the preservation of a famous French physician, will quickly cure you of all nervous or disease of the generative organs, such as: **Lost Manhood, Impotency, Pains in the Back, Neurasthenia, Nervous Debility, Prostatitis, Enuresis, Hematuria, Exhausting Debility, Varicocele and Constipation.** It is the only known remedy to cure without an operation. 200 testimonials. A written guarantee given and money returned if it does not effect a permanent cure. \$1.00 a box for \$5.00 by mail. Send for your circular and testimonials.
Address: **DAVID MEDICINE CO., P. O. Box 375, San Francisco, Cal.**
FOR SALE BY ELVEY & HULETT.

MOTT'S PENNYROYAL PILLS
They overcome Weakness, irregularity and omissions, increase vigor and banish "pains of menstruation." They are "LIFE SAVERS" to girls at womanhood, aiding development of organs and body. No known remedy for women equals them. Cannot do harm—life becomes a pleasure. **\$1.00 PER BOX BY MAIL.** Sold by druggists. DR. MOTT'S CHEMICAL CO., Cleveland, Ohio.
FOR SALE BY BEN L. BEAR, UP-TO-DATE DRUGGIST.

Holiday
Linens
